

Warehouse Management Software

for Sage MAS 90 and MAS 200

Look to Accellos WMS to extend MAS 90 and MAS 200 into the distribution center

Manage the physical handling of goods in the warehouse using Accellos WMS's internet, wireless and barcode technology

Gain the accuracy, efficiency and service improvements needed to grow

Grow your business at an affordable price with an extremely fast ROI

SMALL AND MEDIUM SIZED BUSINESSES PREPARE FOR GROWTH

Small to mid-sized manufacturers and distributors have the ability to increase order volumes and provide world-class customer service without incurring additional warehouse operating costs. Accellos customers can manage and increase service expectations by consistently ensuring orders are out the door faster, without the addition of warehouse staff.

A COMPLETE WAREHOUSE MANAGEMENT SOLUTION

The Accellos WMS Powered by Radio Beacon integration to MAS 90 and MAS 200 enables customers to benefit from the seamless, paperless transfer of information between the back office and the warehouse. Automatically triggered background processes replace labor-intensive procedures such as Sales Order Invoice Data Entry, ASN Data Entry, Purchase Order Receipt of Goods Entry and Inventory Transaction Entry. The power and flexibility of Sage MAS 90 and MAS 200 is extended with these enhancements to bring the solution into the warehouse with Accellos WMS.

- Allocate stock to orders based on site-specific rules or ad hoc requirements
- Reduce warehouse walk time through directed picking
- Increase picking accuracy by reducing the handling of goods in the warehouse
- Eliminate data entry and keying errors associated with manual processes
- Maintain an accurate perpetual inventory without interrupting operations with real time cycle counting

IMPROVE WAREHOUSE PERFORMANCE

Streamline warehouse operations with Accellos WMS!

- Drive costs out of every warehouse operation, including receiving, inventory movement, picking, packing and shipping
- Validate items using wireless devices as they are picked, received or moved
- Ensure the right goods are shipped in the right carton to the right customer with interactive verification of every function
- Optionally, use batch driven, paper based picking documents to collect orders and validate at a packing station
- Integrate multi-carrier shipping to further streamline outbound processes
- Real-time feedback from the warehouse provides customer service and operations with up to the second status of warehouse activity

ADVANCED MULTI-BIN FOR MAS 90 AND MAS 200

Keep real-time inventory by bin location

- Multiple bins per product
- Flexible bin rules for greater control
- Move product from bin to bin with ease

Accellos WMS for Sage MAS 90 and MAS 200
