

## FAYE BUSINESS SYSTEMS GROUP OFFERS SAGE MAS ERP WELLNESS REVIEWS

Los Angeles, CA – May 17, 2010 – Faye Business Systems Group is pleased to announce the availability of Sage MAS ERP Wellness Reviews.

*Wellness Reviews* will include FBSG consultants performing an in-depth analysis of client Sage MAS 90 or MAS 200 installations and ultimately provide a report with a summary of findings. These reports will summarize problem areas as well as the overall status of the system, providing clients with in depth information about the software's configuration. Businesses will be able to use these reviews to ensure their MAS configuration is running at an optimum and secure level.

According to David Faye, CEO of Faye Business Systems Group, the *Wellness Reviews* will provide an in-depth study of security settings, the System Activity Log, all modules setup options for consistency and best practices, backup settings, as well as the rebuilding of key files and sorts. "It's our hope that these reviews and related reports will help our clients take a proactive approach to managing their accounting and ERP data," said Faye. "Knowing about system limitations and potential issues ahead of time will eliminate what many times is the surprise effect of having emergencies appear during critical functions like invoicing, payroll, month end closings, and updates."

The *Wellness Review* will also include an analysis of file sizes as well as reconciliation and balancing related to the AR Aging Report, the AP Aging Report, and inventory valuations versus General Ledger totals. Said Faye, "These reconciliations should really help controllers and CFOs stay on top of the accuracy of the data in their Sage MAS 90 or MAS 200 systems".

For current clients of FBSG the review is given once a year at no charge. For clients with annual support contracts with FBSG, these reviews are provided twice a year at no additional charge.
