

The Power of Sugar in the Palm of Your Hand

With SugarCRM Mobile, you can connect with customers anywhere, any time, at the speed of business.

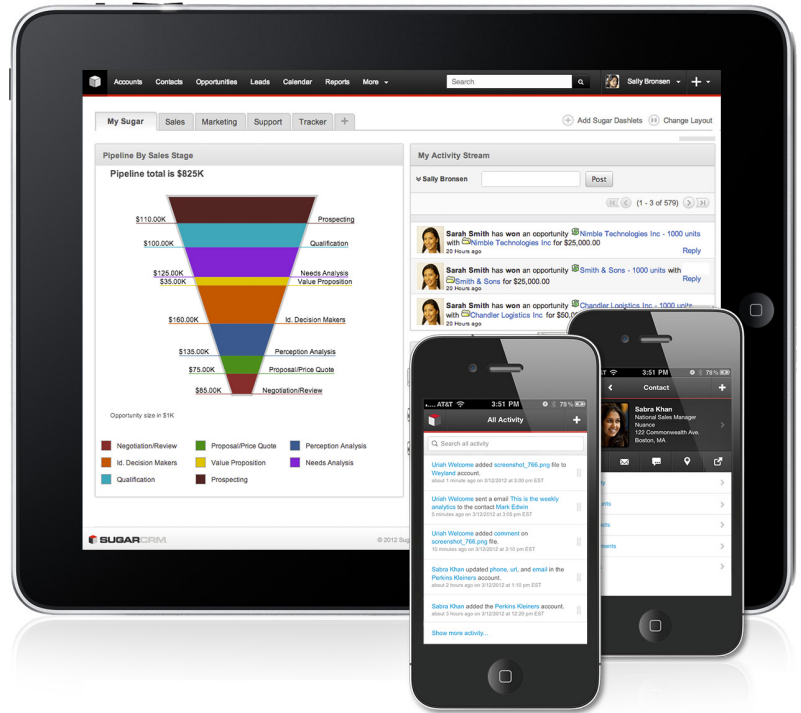

SugarCRM Mobile provides you the ability to drive your business from anywhere through an interface that is fast and intuitive. With SugarCRM Mobile, you will enjoy **faster actions**, **faster understanding**, and **faster connections** for the most responsive customer engagement no matter where you are.

Faster Actions – SugarCRM Mobile’s Quick Create, Dynamic Search, and Quick Summary allow you to easily locate and administer key information to manage your sales, marketing, and support activities.

Faster Understanding – SugarCRM Mobile offers a consistent mobile experience between the browser and the mobile device. SugarCRM Mobile also allows you to easily transform data into knowledge through features such as full text search, filters, and favorites.

Faster Connections – Native device integrations such as click-to-call, click-to-text, and GPS mapping allow you to get the most out of every customer interaction by engaging your customers the way they want you to.

“
 Sugar’s iPhone app looks great and has streamlined the sales process for our field team.”
 Matthew Taylor
 President & COO, USAFact
 Riverside, California
